

THE OPHIRAM FOUNDATION

Telephone : 852 2441 7773 Facsimile : 852 2146 9000

The work we intend to carry out is unique and very far reaching, insofar as it will culminate in a full release of all aspects of the Plan, globally, whereby the final fruits of all the work will then be in the possession of all the recipients.

The final recipients are the leaders of all world Governments, heads of business and charity, the media and key members of the public.

Their responses to the submission of the finished work will set the stage for a summit meeting to answer all questions and then implement the Initiative globally.

Nothing on this scale has ever been attempted before.

The fundamentals of this Programme are now detailed below.

With Love and Hope,

Elijah Saatori

Elijah Saatori,
[Evangelist & Administrator]

www.TheOphiramFoundation.org

<http://Ophiram-Foundation.ZION-Corp.net/NET-InAction.htm>

WHAT IS OPHIRAM?

The Ophiram Foundation is a humanitarian, non-profit Project managed by Zebra Industries (Orogenesis Nova) Ltd - Z I O N for The Glory of The Lord GOD - Amen.

Many years of background work have already been carried out for the Ophiram Foundation. After the first few years of work was completed, a hundred thousand word book was prepared to illustrate the kind of future we can expect, once Ophiram is properly launched. (The book has deliberately not been published yet, but is available for your personal study at anytime - now re-titled "The Messias Preparation").

Now that the world is fully computerised, we are ready to move to the Second Phase and globally release all the work.

The primary goal of Ophiram is to eliminate poverty, recession, depression, economically motivated crime, unemployment and low quality goods and services worldwide, whilst creating an unlimited reservoir of resources and capital for all people in every nation.

Ophiram has formulated a unique method for achieving this grand ambition.

As with any paradigm shift in thinking and economy, it begins with the idea and is realised when the idea is imparted to the right people and organisations, and then accepted.

The idea is called Ophiram, (to be administered by The Ophiram Foundation) and the method of realisation is held with Zebra Industries (ZION) which is a design, marketing, new products and publishing Company in Hong Kong.

[Copyright in all associated material is held with ZION, with permissions to quote available, once formally requested in writing]. Unauthorised use of any of this material contravenes this Copyright.

We are now prepared to scale down current normal work and dedicate a large amount of the Company resources, to releasing

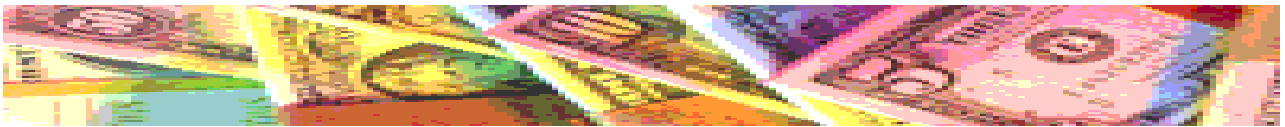

the Ophiram material, under cover of a new non-profit organisation, The Ophiram Foundation, when Grant funding is agreed.

▼ PROBLEM IDENTIFIED

In the past 100 years or so, the demand for money has vastly outstripped the ability of the system to provide it. The consequence is poverty, unemployment, recession and depression, with its attendant human suffering.

Everything we now see in human society can be broadly narrowed down to the product of only two things, human labour and money. Without people working, nothing exists in society as we know it, and without money for salaries, people cannot work. Quite simply, there is not enough money in the world system to cater for the demand for it. All other problems we know of ensue from this simple formula.

▼ SALARIES

To enable every able bodied man and woman who desires to work, the money must be available to pay them. To create this wealth requires the goods and services they produce to be sold to make a profit. From these profits the salaries are paid. To vastly increase salaries requires huge increases in profit and the current economic system does not allow for this, nor can it employ everyone in the world, hence unemployment and poverty.

▼ THE SOLUTION

Europe has just introduced a single currency, proving that such an idea can indeed be done.

Ophiram proposes to introduce a single currency worldwide, although this on it's own will not be enough, it is the mechanism that creates the currency that is all important, and we have this new mechanism ready for global release, known as NET or New Economic Theory.

How can all the Nations of the world be persuaded to adopt a single currency? The primary answer to this would be, firstly prove the benefits of such a principle by persuasive argument and example, with all the right people and Organisations. Then, once the benefits are clearly understood, this understanding will justify the changes that are required. Finally, after

careful explanation and illustration, such required changes can then indeed be implemented.

▼ NEW ECONOMIC THEORY: METHOD & BENEFITS

Aside from introducing a single global currency, NET promotes the following changes:

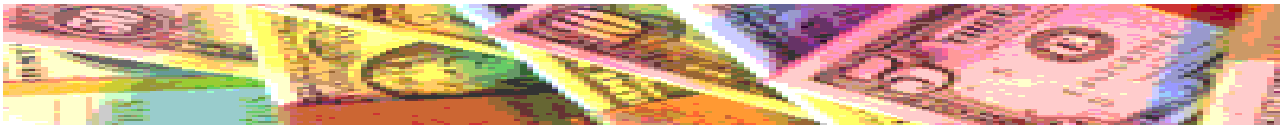

- 1). Using the US dollar as equal to one unit of the new RAMU currency (The Notes are code named RA (₣) and the Coins MU (₯) for the time being [Readily Available Monetary Units]) the currency is firstly created in gigantic volume, equivalent to over 100 times the amount of all existing currency in circulation today.
- 2). All levels of employment in action throughout all industries and occupations worldwide are indexed. Pro-rata to age and experience, the highest paid salaries in each occupation level are identified, in US\$ per month.
- 3). A second New Salaries Index is prepared, whereby the amounts paid each month are vastly increased, by a factor of 10 or more and are specified in RA the new currency.
- 4). Networked through all Banks and Financial Institutions worldwide, once the single currency is introduced, salaries are then paid according to the new index, using the newly created, limitless pool of currency that has been printed and stored in Banks worldwide.
- 5). Employers, employees and self employed people globally, have their salaries and raw materials' overheads all paid for independently by the new system (NET), in return for ensuring the highest possible quality of goods and/or services are produced for the marketplace.
- 6). When the goods and/or services are sold at retail, within industrial categories, or to the end user, the actual cost of each item sold is discounted by 77%, whereby it actually sells at 23% of the cost of production, plus an artificial profit (equal to 35% of the final supply price) is separately paid by the central system for the successful sale of each item, or for the successful performance of each service.

This is achieved by actually physically printing the currency in sufficient volume to power this equation. This formula successfully eliminates inflation, recession, depression, unemployment and low quality goods and services, as well as virtually nullifying all forms of economically motivated crime, and will create a New World, once correctly implemented.

Above all else, it must be understood, that the formula could never have

worked in the past, without the help of the powerful computers, now available today, and especially, it can never be practised successfully by any one single nation or economy. It can only succeed once adopted by all nations and economies worldwide. To impart and release this 'Vision' is the primary goal of The Ophiram Foundation.

7). Companies and individuals now compete to sell their goods and services based on quality alone. Their overheads being all paid for, and the monies they receive for all sales are passed back to the banks, less the profit mark up which they keep. This profit mark up is used to power the new stock market and to show an index of how well each Company is doing, in much the same manner that the stock market runs today.

▼ HOW NET ACTUALLY WORKS IN REALITY

Budgets for production, salaries and overheads are created by each company or self employed individual, and the funds are then physically created or allotted by the Banking system in the new currency to cover these costs.

The highest overhead may sometimes be the salaries.

For example, the lowest paid worker may be a factory cleaner. However, the salary for this worker will be in the region of US\$2500 per week, pro rata to the new currency, using the New Salaries Index (to be created).

The new salaries index will reflect all known, specified, occupations worldwide, plus new categories will be created to cater for everyone, as well as the new industries that will spring up in the wake of successful implementation of NET.

The New Salaries Index is critical to the understanding of how NET functions, and is related to age, qualifications, specialised merits, and working experience. The New Salaries Index has a special section for students to receive remuneration, based on how well they perform in their studies and exams.

The materials and/or systems required to create the raw product or service being supplied, are also paid for by the new economic system.

The transition from the existing product and service creation and supply system currently in place globally, is fairly easy, since existing financial data for all elements is readily available.

One of the most interesting, additional benefits of NET, is centred around the

creation of Brand New Industries, Products and Services (New Projects) that currently do not exist right now, because of economic constraints.

For example: Any new project, industry, product or service is firstly priced out in detail based on the required raw materials and salaried personnel needed to create the end product. As long as it is benevolent, creates employment, and competes for quality and utility within the market, it will be always be approved. The approval process is implemented by the requisite Banking system in liaison with local Government.

Once approval is given, the funds (new currency) are then literally printed up to finance the project and away it goes, according to the business, production and marketing plans. [Existing products and services are also financed and supplied in much the same way]

▼ THE FINAL FORMULA FOR THE GLOBAL ERADICATION OF POVERTY NOW UNFOLDS AS FOLLOWS :

Unlimited creation of the new currency under the NET scenario, provides limitless resources for salaries and materials and guarantees a job for everyone worldwide. (New Industries are created specially to take advantage of the New System, and ensure all unemployment is eradicated).

Vastly increased salary levels puts huge new spending power in the pockets of all people.

Increased spending leads to prosperity and demand for more products and services. (Inflation is eradicated by the 77% product/service supply mandatory discount). Entrepreneurs, prospective new Company Directors and the Stock Market are stimulated by the 35% "artificial profit/merit payment system", for all products and services successfully sold/provided worldwide).

Satisfying the new demand, generated by the huge spending power of the world public, stimulates employment and the generation of additional, new products and services.

Large, ambitious new projects, that were hitherto economically impossible, can now be financed using the NET Model. For example: Mining the asteroids; Launching orbiting space hotels and building commercial moon bases; Farming all the world's deserts; Capping and totally eliminating all water, air, land and sea pollution; Totally renewing the forests and replenishing the oceans; Creating entire new ranges of commercial, consumer products and custom new products for industry and the general public; Ensuring advanced medical and health care is available for all people in the world; Guaranteeing a top quality education for every student in the world; Allowing current, poverty stricken people, or working couples in difficult financial situations, to raise a family or adopt special needs children easily, will become an everyday reality. In fact, anything that is benevolent can indeed now be done, with the working population benefiting in every way. (The potential list of new things

that can be achieved using the NET model is literally infinite!)

Finally, nothing will be impossible, because the economic system has been changed to remove all the flaws. Limitless wealth creation ensures a new level of prosperity for all people. Poverty, recession, depression, inflation and economic crime will become a thing of the past in the New Economy.

Since the economy is an artificial creation in the first place, it really is high time to remodel it to ensure it is flawless, without weakness and greatly broadened in scope to eliminate all the current, known problems that beset our world today. Using the NET model, this can indeed now be done, and is the core of the Ophiram Foundation vision.

▼ ADDITIONAL BENEFITS

In such a new system as NET proposes, to commit a crime for money will be absurd and totally unlikely as the system guarantees a hugely well paid job for everyone who wants one on earth. The only true economic crime will be flatly refusing to work for no good reason, and for this, large financial penalties would be introduced to ensure that the accumulated wealth of "short term for pleasure" workers, is greatly reduced to guarantee that they take up gainful employment in some area.

Working hours can then be shortened to soak up the available employment pool, and to give people time to enjoy their new found wealth. (Compulsory retirement ages can also be dropped or modified)

Travel and tourism would experience colossal growth, leading to the friendly intermingling and migration of people within all countries, which would be a major precursor to world peace everywhere.

Ophiram is completely non-political by nature, and would expect the current sovereignty and political systems of the existing nations to evolve rapidly, naturally, in response to the new economy and its myriad benefits.

Wars could and should die out easily, as Countries and Governments focus on managing the myriad benefits of the new system. Everything on earth will improve in huge leaps and bounds: housing quality, health care quality, educational achievements, product and service quality, and the general standard of living for all people everywhere will experience a Renaissance, hitherto impossible under the current system. Pollution will become a thing of the past as it will be economically feasible to wipe it out entirely; this applies also to hunger/starvation and the current ravages experienced by certain land masses around the world.

Farming and education will be vastly improved. New construction can occur with ease. There is nothing beneficial that cannot be done using the NET model.

Charities will become multi-national corporations, realising their dreams by

free access to the new wealth system.

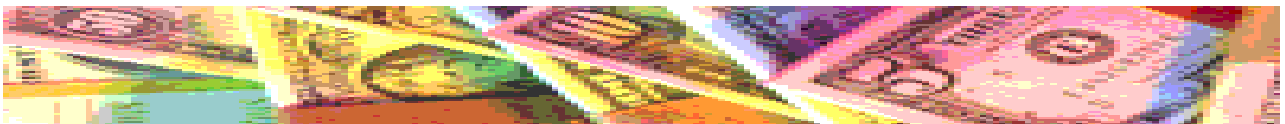

What sells and what doesn't, will be dictated by the purchasing power of the people, based on quality and availability only! The need to buy because a product or service is "cheap" will simply die out! Democracy will flourish. Low quality products and services will simply die out, when people stop paying for them, with the associate companies involved in their production, merging with more successful Companies within the same industrial genre.

Everything will constantly move forward, and could easily culminate in incredible new beneficent technologies being developed, some of which could be used to take us to the Alpha Centauri Star System, within the next 20-30 years, rather than in several hundred years at the current rate of development. This is stated, because part of the NET model envisages Special Funds being established to stimulate and encourage entire new technologies to be developed by people who are currently unable to do so (unknown geniuses), because of the nature of the existing Venture Capital systems. Another such example maybe a Healing Chamber, whereby sick people enter the Chamber, it is adjusted to suit their malaise, and they come out completely cured.

The realm of science fiction is already science fact in many areas. There are in fact, no limits, given the right stimulus and the right time frame.

We believe passionately now, in the face of all our evidence, that NET is just such a "Right Stimulus" and that the right time is indeed now!

There are numerous other benefits to this plan which can be revealed in more detail later.

▼ IMPLEMENTING THE NET PLAN

In order to make such a grandiose scheme work, communication of the plan and worldwide approval must first be implemented and obtained.

The correct and well presented release of the entire Manifesto, is paramount to the entire concept being understood and eventually accepted.

▼ REMAINING WORK TO BE DONE AS A PRELUDE TO THE GLOBAL RELEASE OF THE MANIFESTO:

STAGE 1). Create the New Salaries Index and sample examples of the new currency in many denominations. From 10 million RA down to 1 RA.

STAGE 2). Produce the entire NET Manifesto in English and every other major language, and print a large volume of the bi-lingual Booklets, together with CD ROMs and a multi-lingual website.

Additionally/optionally, publish the 100,000 word book as a 'Science Fiction' soon to become 'Science Fact' Book, to generate income to help cover some of the operational and manifesto release overheads.

STAGE 3). Issue the final material to the leaders of all Governments, all Banking & Financial Institutions, all Major Charities, select Corporations and all Media Publications worldwide for Invitation and/or Feedback.

STAGE 4). Organise a NET Global Summit Meeting to invite these leaders to attend and hear the full Presentation over a three day period (or longer). This will then give all recipients the chance to have their questions/concerns answered.

STAGE 5). Finally, create a schedule for acceptance of the Plan and changeover of the currency system, and the Agenda for complete implementation of NET in every nation on earth.

▼ PROBLEMS

Persuading nations like America and Iraq, Pakistan and India, China and Taiwan, North Korea and South Korea, Israel and Iran to begin spending the same currency unit will be the hardest part of the operation, but is by no means insurmountable, with God's help.

Once the full implication of all the benefits of NET is understood, it will be logically feasible to broker Peace Treaties between these Nations, in the interests of the mutual prosperity that will ensue. Peace Treaties may end up becoming a prerequisite for full global adoption of NET and One Currency, under the auspices envisioned above.

Amnesty for career criminals would be another option to help their transition into gainful, highly paid employment.

The forgiving and wiping out of some old debts, under the debunked previous financial system, would also be another advisable option, on a case by case basis, to start the New System with a clean slate.

In any event, the majority of the planet is in one democratic form or another, with those who are not, being ironically, the countries that stand to benefit the most from NET.

It could well be the people, once they learn of this new economic option, that insist it be adopted, since it is "The People" who stand to benefit in every conceivable way. These "People" are also Leaders in every global institution,

relevant to the success of NET.

The anticipated time frame for adoption of the Plan is 3-5 years from the date of the final global release of all multi-lingual material.

▼ CAN THIS ALL REALLY AND TRULY BE DONE?

Foundations, are constantly funding activities across a diverse spectrum of benevolent fields. Often, such research just fails to achieve its goal or is never utilised; similarly with some active projects.

This Plan Ophiram is offering herein, takes the form of an actual, working experiment, in so far as the final material will be released in the "positive". That is to say, it will be released, marketed and promoted as a new alternative to the current 'failed' economic system, and pursued to it's final conclusion.

It will be a living, breathing, exploratory new Project, that can be gauged by the level and character of response it receives when released, as well as being a targeted "Active Plan", that has real, tangible benefits. (They are also many variables for a Second Level of release, in due course, and these are covered more deeply in the 100,000 word book)

Once the full benefits are realised by the Nations, it would almost be 'criminal' not to implement them.

We fervently believe it can be done, or at least a modified version can succeed in being accepted.

▼ COSTS OF RELEASING THE OPHIRAM VISION

Since we are currently based in Hong Kong, and have been for over 16 years now, the cost estimates below are in Hong Kong Dollars. The economy of Hong Kong is very different from that of the United States or the UK. Whilst it is projected at present to run this operation from Hong Kong, relocating to the US would be a far better option, and is one that might be requested when a favourable Grant Funding offer is under serious consideration, subject to normal Foundation guidelines for an Exploratory Project of this nature.

The costs outlined below are broadly based on current figures available for the Hong Kong market. (Have also included the figures in US Dollars at the approximate, pegged exchange rate of HK\$7.78 to US\$1.00)

The bulk of the spending in releasing the material to the world will be utilised in writing up the entire plan in the major languages and printing

it, and producing the digital version, and mailing it to the leaders of the Institutions mentioned earlier.

Based on past experience in publishing and production, it should take about 18 months to prepare everything for production and mailing, with a small, full time team of University graduates and a translation company. Then another 6 months or so for mass producing and releasing the entire accumulated material worldwide.

With the powerful computers and databases now available, a lot of the necessary information and research material is already available (it just needs to be formatted correctly). All that remains is to then produce the New Salaries Index and create the website and the Booklets, CD ROMs and miscellaneous materials for global release and distribution.

It is anticipated that a total budget of between HK\$13.226 million (US\$1.7 million) and HK\$19.45 million (US\$2.5 million) will take the project through to the point of inviting the leaders to attend the Summit.

Stage One of the Plan will require the following initial set-up Budget:

1). New dedicated Ophiram Launch Office in Hong Kong for 18 months: @ HK\$30,000 (US\$3,856) per month. TOTAL: HK\$540,000 (US\$69,409)

2). Salaries for the core data collection, final research material, and production staff for 18 months:

Two Trainee Juniors: @ HK\$7,500 (US\$964) per month.

Subtotal 1 : HK\$270,000 (US\$17,352)

Five Full Time University Graduates:

Three Middle Level : @ HK\$14,000 (US\$1,799) per month.

Subtotal 2 : HK\$756,000 (US\$97,172)

Two Senior Level : @ HK\$17,500 (US\$2,249) per month.

Subtotal 3: HK\$630,000 (US\$80,977)

SALARIES TOTAL FOR STAFF FOR 18 MTHS: HK\$1,656,000 (US\$212,853)

3). Office Set Up: Equipment, desks, etc. The basic requirements of a normal office environment:

TOTAL: HK\$250,000 (US\$32,133)

4). Miscellaneous and sundry items budget for 18 months :

TOTAL: HK\$360,000 (US\$46,272)

5). Director's remuneration and expenses for 18 months : @ HK\$25,000 (US\$3,213) per month.

TOTAL: HK\$450,000 (US\$57,840)

TOTAL INITIAL SET-UP BUDGET: HK\$3,256,000 (US\$418,509)

Stage Two of the Production will require the following launch Budget, having all requisite material on Hard Drives through the 18 months of work projected above:

1). Mass production of a full colour glossy A4 booklet (approximately 70 pages) presenting and detailing every aspect of the Ophiram/NET Plan.

Production Volume: English only: (approx 70,000 booklets):
HK\$1,540,000. (US\$197,943) Then smaller quantities in all the main language groups (approx another 250,000 booklets total): HK\$5,500,000 (US\$706,940)

TOTAL PRINTING/PRODUCTION BUDGET: HK\$7,040,000 (US\$904,488)

2). CD ROMs containing everything: 320,000 units:
TOTAL HK\$3,840,000 (US\$493,573)

3). The Old and New Salaries Index as separate items will be on the web site only, and will be fully searchable. Everything else will also go on the web site in all languages: To create the website and Salaries Index database: HK\$170,000 (US\$21,850) approximately.

TOTAL STAGE TWO PRODUCTION BUDGET (APPROX) : HK\$11,050,000 (OR US\$1,420,308).

Stage Three of the Launch will require the following Budget (approx):

1). Mailing the entire package to all World leaders, Banks, Financial Institutions, Charities, Media Network Heads, and select Major, Medium and Minor Corporations.

TOTAL STAGE THREE LAUNCH BUDGET (approx) HK\$4,368,000 OR US\$561,439.

Stages Four and Five are pending analysis of the results from the mailing feedback, and media release responses, and will be budgeted and financed separately from the above core operations.

If you think you are in a position to help financially with a grant or suchlike, or know of a person, Foundation or Institution that is, please contact us below. Please contact us in any event if you have any comments, questions, suggestions or opinions.

As additional monies become available to ZION, which is only a small business at the moment, these will also be contributed.

<http://Ophiram-Foundation.ZION-Corp.net/NET-InAction.htm>

NET in action – Narrative Explanation Click Above

We truly believe it really is the right time to actually do this now, and stand ready to proceed at anytime. Any and all questions can be answered, and full, more detailed budget breakdowns can be supplied if we can proceed to the next level in this Application.

Thank you for reading this through. [Email here](#) for further information.

In pursuit of a better world for all people, and for The Glory of The Living God, JESUS Christ, King of Heaven and Earth - Amen.

With Love and Hope,

Elijah Saatori
